

CONSTIX® Swab, SF-9

CONSTIX® SF-9 sealed foam swab consists of polyurethane foam bonded to a polypropylene handle without the use of adhesives or binders.

The polyurethane foam head provides good particle entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery or removal. Excellent for applying resins and adhesives.

Though compatible with many common solvents, the SF-9 is not recommended for use with ketones such as acetone or MEK.

Features	Benefits
Mini foam head	<ul style="list-style-type: none"> • Enable good access to small features and difficult to reach surfaces

Part No.	Description	Packaging
SF-9	CONSTIX Sealed Foam swab Head dimension 0.14" x 0.3" (3.6 x 7.6mm); handle diameter 0.10" (2.5mm); total length 2.6" (66.0mm)	500/case

Product Information

Head Material	100 PPI open-cell polyurethane foam
Handle Material	100% polypropylene
Construction	Thermally sealed and attached

Packaging

	EA/BG	BG/CS	EA/CS
SF-9	100	5	500

EA = Each, BG = Bag, CS = Case
