

CONSTIX[®] Swab, SF-11

The SF-11 swab consists of a foam head formed over the end of a 6" cotton-tipped applicator with wood handle. The foam head is an 100 PPI sealed closed-cell polyurethane foam.

The soft, polyurethane foam head provides good particle entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily absorbed for applications involving solvent delivery or removal.

No adhesives are used, and the wood handle is solvent resistant. The swab is low in particles and fibers and is well suited to applying solutions and adhesives. Though compatible with many common solvents, the SF-11 is not recommended for use with ketones such as acetone or MEK.

Features	Benefits
Birch hardwood handle	<ul style="list-style-type: none"> Makes it stiff enough for vigorous swabbing

Part No.	Description	Packaging
SF-11	CONSTIX Sealed Foam swab Head dimension 0.33" x 1" (8.4 x 25.4mm); handle diameter 0.09" (2.2mm); total length 6.0" (152.4mm)	500/case

Product Information

Head Material	100 PPI open-cell polyurethane foam
Handle Material	100% polypropylene
Construction	Sealed foam over cotton-tipped applicator (CTA)
Packaging Materials	Outer bags, low density polyethylene (LDPE)  Case (CS), corrugated fiberboard (PAP) 

Recycle Symbol Key

PET	
HDPE	
LDPE	
PP	
PAP	

Packaging

	EA/BG	BG/CS	EA/CS
SF-11	500	1	500

EA = Each, BG = Bag, CS = Case
