

Plastic Mopping Hardware

Autoclavable carts and accessories

Description

Contec offers a variety of mopping system components such as carts and wringer sieves made from a unique polypropylene copolymer plastic that is both durable and lightweight. Carts, and some buckets, include caster wheel assemblies. Buckets are color-coded for easy identification of waste vs. fresh solution. Compatible with all common disinfectant solutions and most common solvents. All components listed may be sterilized by autoclave or gamma irradiation. Autoclavable at 121 degrees Celsius for 30 minutes.
