

# Techclean Anti-Static Wipe

2362-150

Techspray's ESD-safe products can help maintain work areas within the ANSI/ESDS20.20 standards set by the ESD Association (www.esda.com). In a static-free environment, the work area, tools and personnel form a circuit (see diagram to right). Electrostatic Discharge (ESD) occurs when the charges of two surfaces with a large electronic potential (difference) equalize instantaneously. The resulting discharge or spark can cause catastrophic or latent damage to electronic components. ESD programs maintain an equal potential by maintaining continuous contact with ground, avoiding ESD damage. Cleaners, lotions, and coatings are an integral part of an ESD control program.

## Class 10 anti-static knit polyester wipe

Polyester wipe that is interwoven with DuPont's NEGASTAT carbon yarn. NEGASTAT dissipates static charge, preventing static buildup and allowing dissipation. Perfect for dry wiping ESDsensitive components and boards. Tear resistant to allow cleaning around throughhole leads without fraying.

- Class 10 cleanroom qualified
- Anti-static will not generate charge
- Class 10 cleanroom laundered
- Tear resistant

## Product Packaging
